

Safari 5 (Windows and Mac OS X)

The default setting in Safari is set to block pop-up windows. If this option is selected, you might experience reduced functionality in Online Banking. Safari does not have content control to allow exceptions on a per-website basis. The only options you have are to turn on and off the pop-up blocker.

1. If using **Safari for Windows** click on the **Gear Wheel** on the upper right of the window. For **Mac** click on **Safari** on the upper left of the window.
2. Click **Preferences** on the drop down or uncheck **Block Pop-up Windows** by clicking on **Block Pop-Up Windows**.

3. On the **Security tab**, uncheck **Block pop-up windows**.
