

## Safari — Adding third party cookie exceptions

The default settings in Safari are set to accept cookies only from sites you visit, blocking third party cookies. If this option is selected, you might experience reduced functionality in Online Banking. Third party exceptions cannot be added to Safari—the only options are to always accept cookies or not accept them.

1. If using **Safari for Windows**, click on the **Gear Wheel** on the upper right of the window. For **Mac**, click on **Safari** on the upper left of the window.
2. Click **Preferences** on the drop down.

3. On the **Privacy tab**, change **Block cookies** setting to **Never**.
